

Nitish Gupta

Bengaluru, India | +91-9571039577 | nitishgupta1101@gmail.com | linkedin.com/in/nitishgupta1101

Skills

GitHub Copilot, Claude Code, AI Agent Workflows | AWS (S3, Lambda, ECS, Step Functions, DynamoDB) | Kafka, Microservices, Event-Driven Architectures | Kubernetes, Prometheus, Grafana | Snowflake, MongoDB, Databricks | Java, Golang, SQL | Spring Boot, Spring Batch

Experience

Goldman Sachs

Sep 2024 – Present

Software Engineer (SDE-2)

Bengaluru

- Led development of the firm's global margin and clearing data platform, enabling standardized consumption of trade, position, valuation, margin and exposure datasets across **100+ CCPs globally**.
- Modeled and governed enterprise margin datasets spanning **10M+ trades**, establishing a single source of truth consumed by Risk, Liquidity, Credit, Controllers, Regulatory Reporting, Operations, Settlements, Ledger and Finance organizations.
- Designed canonical data models and cloud-native hydration architectures on AWS that transformed highly heterogeneous CCP data into a unified representation, significantly reducing onboarding effort for new clearing venues and downstream consumers.
- Established enterprise-grade data quality, reconciliation and lineage controls covering completeness, accuracy, consistency and timeliness, improving trust in mission-critical exposure, valuation and margin calculations.
- Partnered with Margin, Clearing, Operations and Risk stakeholders to translate complex business workflows and regulatory requirements into scalable, auditable and resilient technology solutions.
- Architected cloud-native hydration frameworks on AWS for onboarding new CCP integrations, leveraging AI-assisted engineering workflows using GitHub Copilot and Claude Code for specification analysis, schema discovery, data modeling, stress testing and gap analysis.
- Built and leveraged custom AI-agent workflows using GitHub Copilot and Claude Code for CCP specification analysis, parser generation, Snowflake data exploration, Confluence publishing automation, Jira/GitLab integrations, documentation generation and engineering productivity acceleration.

MoveInSync

May 2024 – Aug 2024

Software Development Engineer II (SDE-2)

Bengaluru

- Owned end-to-end delivery of workplace management platform capabilities serving enterprise customers across the EMEA region.
- Acted as the primary engineering owner across requirement gathering, architecture, implementation, deployment and production support, collaborating directly with customers and business stakeholders.
- Delivered customer-facing product enhancements used by leading technology companies and global financial institutions while balancing rapid delivery, scalability and reliability.

Morgan Stanley

Aug 2021 – May 2024

Technology Analyst → Technology Associate → Senior Technology Associate

Bengaluru

- Built a centralized ETL platform that delivered **5x throughput improvement** while reducing infrastructure memory consumption by **80%**; platform adoption expanded across multiple GBM divisions including Post-Trade Settlement and Deposits.
- Architected a distributed load-balancing platform that increased trade-processing capacity by **3x** through dynamic workload allocation and auto-scaling.
- Established observability and engineering excellence standards using Kafka, Prometheus, Grafana, Sonar, JUnit5 and Mockito, creating benchmark implementations adopted across teams.
- Received the **Morgan Stanley GRIT Award** for delivering firm-wide technology innovation and measurable business impact.

Morgan Stanley

May 2020 – Jul 2020

Technology Analyst Intern

Mumbai

- Developed an NLP-powered operational chatbot leveraging Stanford CoreNLP and ELK Stack, achieving **92% query accuracy** and significantly reducing troubleshooting effort for engineering teams.

Education

Motilal Nehru National Institute of Technology (MNNIT), Allahabad

2017 – 2021

Bachelor of Technology (B.Tech), Computer Science Engineering

CGPA: 8.8/10
