Technical Skills

Languages & Runtimes: Java (11+), Python, C++, SQL, TypeScript, JavaScript, Go, Bash

Backend & Frameworks: Spring Boot, Spring Batch, Spring Cloud Stream, Spring Data JPA, RESTful APIs

Cloud & DevOps: AWS (S3, Lambda, Step Functions, Aurora, EventBridge), Docker, Kubernetes, Jenkins, CI/CD

Data & Streaming: Apache Kafka, Databricks, Apache Iceberg, Snowflake, IBM DB2, MySQL, ELK Stack, MQs

Testing & Observability: JUnit5, Mockito, Cucumber, Prometheus, Grafana, SonarQube, Spring Actuator

Professional Experience

Goldman Sachs

Bengaluru, India

Software Engineer / Senior Platform Engineer

Sep 2024 – Present

- **Data Modeling & Platform Architecture:** Architected a greenfield data platform using **AWS (S3, Lambda, Step Functions, Aurora)** and **Lakehouse (Databricks)**. Developed a canonical data model for **10M+ daily trades, positions, and valuations** across 100+ global CCPs, establishing a unified source of truth for Risk and Regulatory reporting.
- **Infrastructure & TCO Optimization:** Replaced legacy private cloud/NAS infrastructure with an AWS cloud-native hydration architecture, achieving a **42% reduction in storage/compute TCO (~\$1.2M annual savings)** and 99.99% uptime.
- **ISA Collateral Swap Automation:** Automated collateral swap workflows orchestrating vendor eligibility, pledge/recall, and ledger updates. Built an integrated ops UI for manual data corrections, maker-checker exception approvals, and real-time tracking, slashing daily operational processing time from **16 hours to 40 minutes**.
- **AI-Driven SDLC Automation:** Extensively utilized **Claude Code and GitHub Copilot** to accelerate CCP venue onboarding for hydrating margin data into the data lake. Streamlined Jira ticket parsing, schema discovery, code generation, and unit testing, reducing onboarding integration time by **75%** (8 weeks to 2 weeks).

MoveInSync

Bengaluru, India

Software Development Engineer

Apr 2024 – Sep 2024

- **VMS Product Leadership:** Assumed end-to-end technical ownership of the enterprise Visitor Management System (VMS) product. Partnered directly with B2B clients like Richemont to extract requirements, architect technical features, and oversee deployment, mentoring a 3-member engineering squad.

Morgan Stanley

Bengaluru, India

Senior Technology Associate / Technology Associate (Global Wealth Management)

Jul 2021 – Mar 2024

- **High-Performance ETL Microservices:** Engineered a multi-partitioned **Spring Batch** loader microservice to facilitate brokerage deposits and sub-ledging for global HNI clients. Achieved a **5x performance boost**, processing **100M records in just 30 minutes**, and reduced system RAM consumption by 80% (15 GB to 3 GB).
- **Distributed Trade Processing:** Architected a dynamic load distribution service, migrating from legacy MQs to **Apache Kafka** for real-time event streaming. Handled trade volumes up to **20M (3x capacity)** via intelligent auto-scaling and parallelization across multiple VMs.
- **CI/CD & Observability Standards:** Streamlined the SDLC utilizing **Blue-Green deployments** and Sonar in Jenkins CI pipelines. Established deep observability using **Prometheus, Grafana, Spring Actuator, and Micrometer**, while drastically reducing testing time via **JUnit5, Mockito, and Cucumber**.
- **Awards & Recognition:** Received the firm's prestigious **GRIT (Grassroots Innovation in Technology) Award** specifically for the transformative performance and operational impact of the generic loader microservice.

Morgan Stanley

Bengaluru, India

Technology Summer Analyst

Apr 2021 – Jun 2021

- **NLP & Observability Chatbot:** Developed an NLP-powered operational chatbot leveraging **Stanford CoreNLP** and the **ELK Stack** (Elasticsearch, Logstash, Kibana), achieving **92% query accuracy** and significantly reducing troubleshooting effort and resolution time for engineering teams.

Education

Motilal Nehru National Institute of Technology (MNNIT)

Allahabad, India

Bachelor of Technology in Computer Science and Engineering – CGPA: 8.8/10

2017 – 2021
